Alike but Different

Incomplete Dominance

Codominance

What We Have in Common

Both are exceptions to normal laws of heredity.
Both occur when alleles for a trait are hybrid.
Both use only upper case letters in a Punnett Square.
In both cases, the dominant allele does not mask out the recessive allele.

What Makes Us Unique

The dominant allele and the recessive allele blend instead of one showing over the other.
Red Flower X White Flower
creates Pink Flower.

The dominant allele and the recessive allele both show on the same organism at the same time.
Red Flower X White Flower
creates a Red/White Flower.
