

Your Long Food Tube

Name: _____

Your digestive system is like a big tube that carries the food you eat through your body. Label each part with words from the WORD BANK. Draw a line from the description to the part of the digestive system.

- A. "I'm the entrance to the food tube. I chew the food up well."
- B. "I store the food for 3-4 hours while digestion is occurring. My churning breaks down protein."
- C. "Waste exits from my opening."
- D. "Final digestion takes place in my 20-foot-long tube."
- E. "I'm a muscular tube that squeezes the food down to the stomach."
- F. "I store the solid waste and remove the water."
- G. "I'm the first part of the small intestine. Food enters me after it leaves the stomach."
- H. "We make chemicals to help break down the food."
